Challenges at Microsoft:

- How can Microsoft innovate more rapidly while executing against current business objectives?
- How can Microsoft better leverage the IQ and insights of the organization across a broad range of challenges and opportunities?
- If you have a new idea for a product, business, or technology, how do you develop it and present it to Microsoft for consideration? How can you find key expertise / insight that you don't have?
- How do you get your idea funded or built?
- If you have a feature suggestion for another team, how do you communicate it? Is that effective?
